## Learning Challenge:

Can you name 2D shapes?
Do you know the properties of 2D shapes?

Draw a line to match the shape to its properties and then name the shape.

This shape is a $\qquad$ . It has 4 sides.

It has 4 corners.
Can you draw a line of symmetry on this shape?

This shape is a $\qquad$ .

It has 6 sides.
It has 6 corners.
Can you draw a line of symmetry on this shape?

This shape is a $\qquad$ .

It has 1 side.
It has 0 corners.
Can you draw a line of symmetry on this shape?

This shape is a $\qquad$ .

It has 5 sides.
It has 5 corners.
Can you draw a line of symmetry on this shape?

This shape is a $\qquad$ .

It has 3 sides.
It has 3 corners.
Can you draw a line of symmetry on this shape?
