

1 2 3 4 5 6 7 8 9

Choose four of these digits. Each one must be different.

Put one digit in each box.

This makes two 2-digit numbers with one decimal place reading across and two 2-digit numbers with one decimal place reading down.

Add up all four of the numbers.

In this example the total is 10.

$$1.2 + 4.7 + 1.4 + 2.7 = 10$$

How many different ways of making 20 can you find?

1	2
4	7
