Change all my digits

Change the number, one digit at a time by doing a calculation so that each digit is the same given number.
Eg in the number 469, change all the digits to a 5

469 – 4 = 465

465 – 10 = 455

455 + 100 = 555

| 6, 987, 043 | Change all the digits to a 5 |

| 1, 849, 327 | Change all the digits to a 6 |
